SUBMERGED AND IN TOTAL DARKNESS

and People Driven from Their Houses-Bottom Lands Endan-

OTTAWA, Ill., May 6.—Seas of water are over and in the five unfortunate Illinois towns—Ottawa, Marseilles. Peru La Salle and Utica. The Illinois rive has risen steadily through the day.
To-night the cities are in total darkness, the result of the flooding of the electric and gas plants

Boats are used

To-day the list of unfortunates by flood was added to by the numbers of people driven from houses which escaped yesterday. Despite all efforts the manufacturing district was totally covered by water this afternoon. As the waters rose building would close down and the employes leave to await

the subsiding of the flood Ottawa will be helpless for a week at least Marsoilles, La Salle and Peru are in an even more desperate condi-tion. At Marseilles, the river steadily rising, is more and more dreaded as the levees weaken. There is little hope they will stand much longer, and everyone in the district threatened has re-moved all property to high ground.

At La Salle the situation is even more desperate than it was last night, the water having advanced from two to three feet all around the city, and the manufactories, the waterworks, street railway and electric light plants still

emo under water. At Utica the waters have encroached still further upon the lower end of the village from the river, and the outlets

The Effects of the Storms in Northern Illinois. Curcago, May 6 -The worst effects of the great rain storms in northern Ilhnois are being overcome by the rail-roads, and traffic is now being gradu-ally resumed, although it will be several days yet before all repairs can be made. There were a dozen washouts on the Santa Fe road alone, but their track has been patched up as well as possible and trains are again in motion,

ulthough some are from eight to ten hours behind time The Rock Island road suffered almos as badly as the Santa Fe, but most of the damage has been repaired. The Chicago river is running from eight to ten miles an hour and many of the low wharves are under water - Severe acci dents to vessels have been caused by the swift current, and navigation was practically suspended to-day. The teamer Robert Mills collided with the Adams-street bridge with great force,

killing Afred, a sallor. The Town is a Lake. ALEXANDRIA, Mo. May 6.—Alexandria is under water. The levees which protect the town ordinarily from the waters of the Des Moines river suc-enimbed last night, and as a result the town is a lake, dotted here and there by houses in which the water is standing from two to six feet deep. It will be impossible to transact any busi-

ness whatever until the floods go down and the lines can be repaired. The tracks of the St. Louis, Keokuk & Northwestern railway have been washed out and traffic 19 at a standstill

The Flood in the Illinois River.

LACCN, Ill, May 7—The Illinois river at this point is higher at present than it has been for a quarter of a central river. tury. The long-continued rains have swept out nearly all the small bridges in the country. The bridge across the Illinois river is covered with water and is liable to be carried away. The Rock Island tracks are badly damaged between Peoria and Bureau, and all trains have stopped. The bottom lands are all under water and no corn will be raised on thousands of acres of land.

Rich Bottom Lands Endangered. WARSAW, Ill., May 6 —The thousands of acres of rich tillable lands in the bottom south of here and reclaimed by a system of levees forty miles long are threatened with inundation. The rains have caused a heavy rise in the Missis sippi, and the river now stands at 18 feet and seven-tenths above low water mark, with the tendency upward. THE FARMER'S ALLIANCE. The farmers are now actively engaged in looking after their

own interests. This is a hopeful sign no matter how hard it may bear upon other interests for the moment. For after all the basis of a nation's prosperity is its agricultural class. The main thing for the farmer is the ability to keep his health. Ill health cut into him worse than farm mortgages or borrowed money or taxes. If the average farmer can keep his health he will be able to meet his obligations. It may take him longer time than he counted upon but he will be able to show a balance on the right side of the ledger eventually. The great danger that he need fear is taking cold.
